PROFILE

Enthusiastic Software Engineering student specialising in frontend web development with strong skills in React, Vue, and modern UI/UX design. Experienced in building responsive applications, including a BBMS (Blood Bank Management System) with database integration and a Doctor's Appointment System. Passionate about creating user-friendly interfaces and applying problem-solving skills to real-world projects.

EDUCATION

- Metropolitan University
B.Sc in Software Engineering
Jan 2022– Dec 2025

SKILL

- Web Design
- Design Thinking
- Front End Coding
- Backend Tech
- Problem-Solving
- Project Management Tools

Mentored students in programming and problem-solving, conducted competition prep workshops, and contributed to content and team mentoring for the 2023 & 2025 Olympiads.

PROJECTS

- **MediBook**
Doctor's Appointment System

[Github](#)

[Live Demo](#)

Frontend project built as a medium for Doctors and Patients to communicate. Manage appointments, dashboards for patients, and dashboard, working hour management for Doctors. Used Next.js, TypeScript.

- **BBMS**
Blood Bank Management System

[Github](#)

Blood Bank Management System is a website. Where a patient or donor can manage their blood donations and the collection system. With proper database integration and location scouting for suitable match.

- **Job Portal**
Job Management System

[Github](#)

[Live Demo](#)

Job Portal is a website. Where an employee or employer can search for companies or worthy employees. With proper database integration and location scouting for suitable match.

- **Portfolio Website using React and Chakra UI**

[Github](#)

[Live Demo](#)

My initial portfolio using JavaScript and Chakra UI.
